

Wildix WebRTC & Microsoft Teams Integration

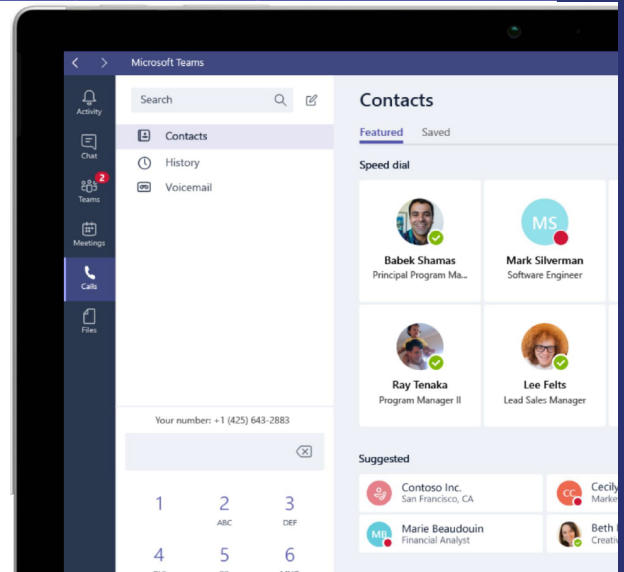

Call2Teams™

Wildix

Why Call2Teams Integration?

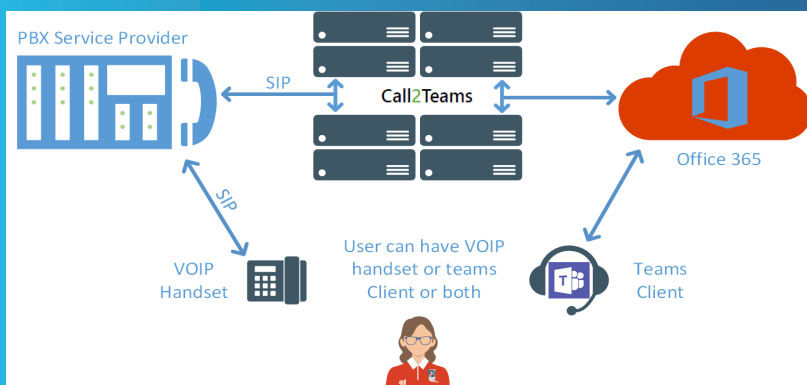

- With Call2Teams you make, receive and transfer calls from inside Microsoft Teams through your Wildix WebRTC system
- You can use your instance of Microsoft Teams as your full communication endpoint
- You can use Wildix WebRTC for call management control, routing, numbers and calling minutes
- You can maintain call reporting and call recording
- Requires no additional Microsoft Architecture
- Gives users the very best of both worlds through Microsoft Teams features and Wildix WebRTC telephony

Very Simple Set Up

- Can be included for free in your Wildix WebRTC PBX service set up.
- Simple subscription rental at £3.00 per user per month
- Requires Microsoft phone system licence or equivalent

How Call2Teams Works

making communication work

The Benefits of Call2Teams and Wildix WebRTC from Evoke Telecom

Call2Teams allows businesses to connect their Wildix WebRTC PBX directly into Microsoft Teams so staff can make, receive and transfer calls from inside Microsoft Teams.

Evoke Telecom have extensive experience in delivering service integrations across the UK.

Greater Flexibility

One commercial route will not fit all customers. Evoke Telecom provides a number of commercial options to best meet the needs of the customer.

Seamless Migration

Teams may not meet all your telecommunications requirements from day one. Evoke Telecom simultaneously deliver calls to both Teams and your Wildix WebRTC telephony, providing you the best of both worlds.

Save Time & Money

Utilises your current calling plan meaning you do not require any extra Microsoft calls & minutes plans.

Scalability

Evoke Telecoms Call2Teams delivery method in Wildix WebRTC is the same as your current Wildix system set up for call concurrence and SIP to solution delivery.

Unify your Communications

Bring together your internal and external communications; phone calls, video, chat, file sharing, screen sharing and email into one unified integrated application.

Future Proof your Business

PSTN and ISDN services will be turned off in 2025. All businesses will have to move to a SIP Trunk based telephone application or a Hosted telephone application.

Hassle Free Number Porting

Moving to Teams does not mean you have to lose your numbers. Because you are integrating into your Wildix WebRTC Cloud PBX you retain all previous numbers and plans

Reliable SIP Connectivity

Evoke Telecom is one of the leading provider of SIP services in the UK, providing connectivity for customers around the world.

Why Evoke Telecom

- Heritage of voice designing solutions across 3 core areas; SIP, Data and Hosted
- Greater flexibility and proven reliability
- Extensive experience backed by a tradition of excellence
- Get the support when you need it 24/7
